

# Vamos fazer louças de papel

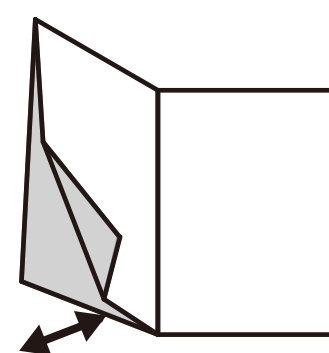

Vamos fazer um prato feito de papel, que pode ser utilizado como uma louça no momento de um desastre. Se colocar sacos plásticos em cima, pode até colocar sopas.

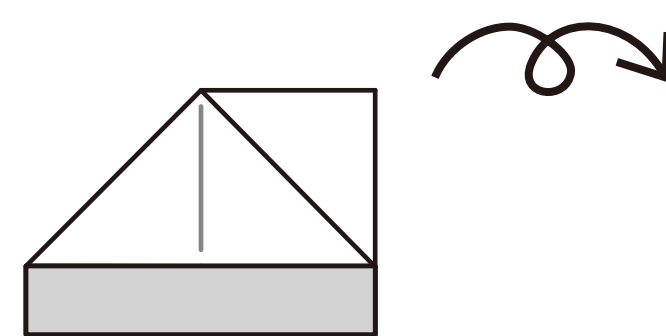

① Dobrar a folha pela metade.

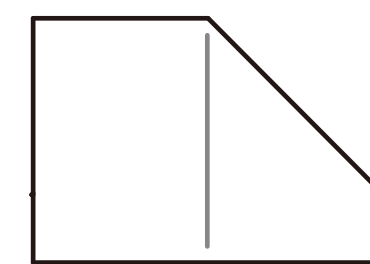

② Dobrar mais uma vez pela metade e deixar a marca da dobra.

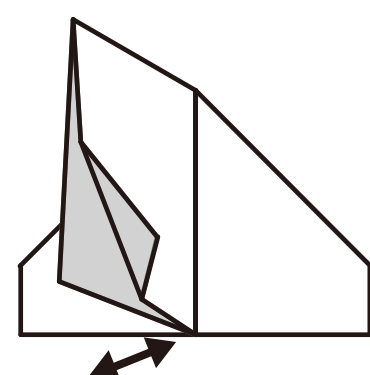

③ Levantar a parte dobrada e abrir de dentro para fora.

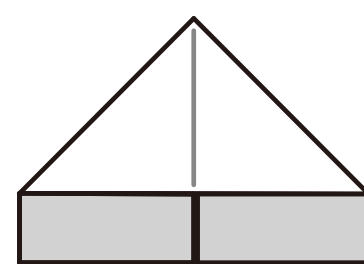

④ Esmagar o triângulo.

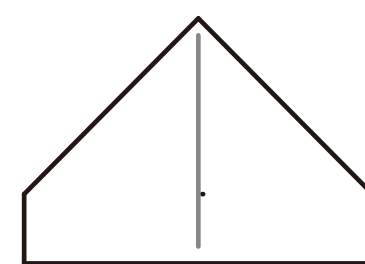

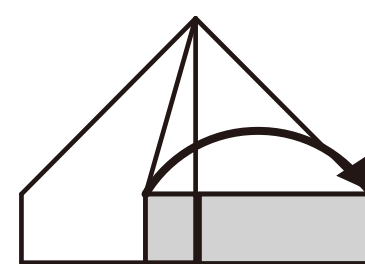

⑤ Virar.

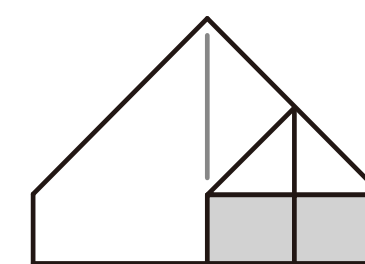

⑥ Da mesma maneira, dobrar o outro lado.

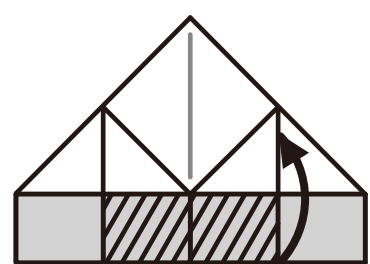

⑦ Dobrar para outro lado a folha que está na camada de cima.

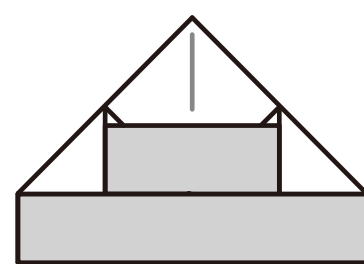

⑧ Virar e dobrar da mesma maneira que ⑦.

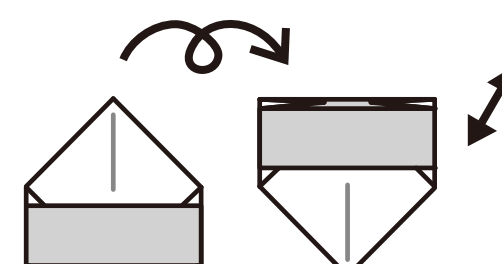

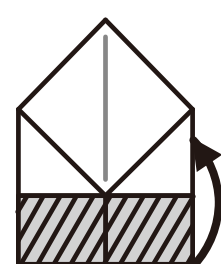

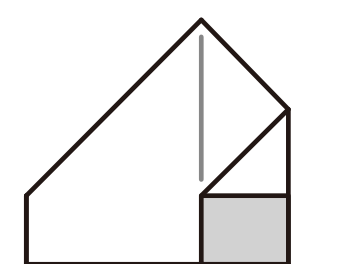

⑨ Dobrar para o meio os dois lados da folha que está na camada de cima.

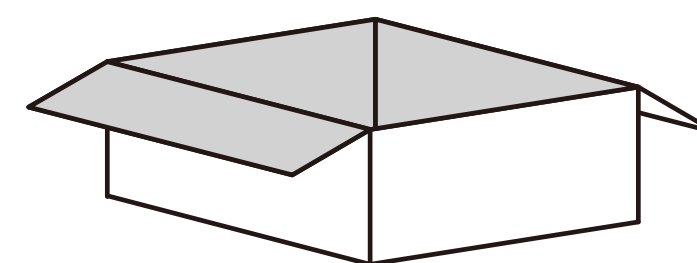

⑩ Dobrar para cima a parte com as linhas traçadas em diagonal.

⑪ Virar e dobrar da mesma maneira que ⑨⑩.

⑫ Virar de cabeça para baixo e abrir a parte de cima.

⑬ Pronto!

Vamos fotografar o prato que fez e colar dentro do quadro abaixo.
